This is a small utility that allows you to install "Multi Desktop" to manage up to 4 Virtual Desktops on your PC. You will have your own icons and wallpaper on each desktop to manage the desktops by your preference. You can move the

windows from one desktop to another desktop by simply drag and drop. In Multi Desktop, all the windows on the current desktop will be hidden automatically. When you want to go to another desktop, you can press hotkey to switch to the desktop. When you want to go back to the current desktop, you can simply press the hotkey again

to go back to the previous desktop. If you are using both Internet Explorer and Firefox as your web browser, you can set "Multi Desktop" to open Internet Explorer in the desktop. If you have multiple monitors, you can choose a different wallpaper style for each virtual desktop. You can have your own icon in the Taskbar so you can

easily switch the desktop. Update History: Version 2.0 [?] Minor bug fix Version 1.0 [?] First version What's New in this Version: 1. Fixed the error when using the "Send Email" feature. 2. Fixed the bug that can lead to unexpected exit. 3. Fixed the bug that can cause slow performance. Known Bugs: 1. The configuration dialog

box may not appear correctly on the first run. Please do not cancel the operation when the configuration window is appearing.

2. The activation hotkey of the program is "Ctrl+F4". 3. When you are using "Multi Desktop", Windows Explorer, WMP, etc. will not be shown on the virtual desktop. **If you have any
