Advanced Text Editor is a word processing utility that comes packed with some handy options for users looking to take notes and compose documents, but also for programmers who need to write code. It is developed in Java, so this application must be installed before you can use it. The interface is clean and neatly organized, as the app keeps all buttons dedicated to the Clipboard options, font customization and paragraph configuration on the top part of the screen. Customize font and paragraph settings As far as the font is concerned, it is possible to change its size, family, color, emphasis mode, make text subscript or superscript, as well as convert it to lowercase or uppercase. When it comes to the paragraphs, you can change the alignment, insert line breaks, pick a highlighting color, as well as modify line space settings. The file can be saved to text as well as compiled and run. Supported programming languages include Java, Python and C++, among others. It addition, it is possible to open RTF files, print the document, rescan it, as well as to insert smileys and images. There are no other noteworthy options provided by this software program. Evaluation and conclusion The program has a good response time to commands and does not put a strain on computer performance, since it runs on low CPU and RAM. There were no stability issues in our tests, as Advanced Text Editor did not hang, crash or pop up error dialogs. Thanks to its intuitive interface and options, this program should be useful to all those looking for a simple text editor or programming code processor. On the other hand, the whole package seems a bit too expensive, especially considering that there are many free tools on the software market that offer the same functionality. The best known and most expensive free text editor is Microsoft Notepad, which costs \$50. LibreOffice Writer is a free alternative. What to Choose? Updated on Jan 5, 2019 What are the free text editors? Free text editors are programs that allow you to edit text. Free editors are powerful and complex, and allow you to customize the fonts, colors, alignments, spacings and layouts. Evaluation and conclusion Evaluation and conclusion Programs such as Word, LibreOffice and Apple TextEdit allow you to write and edit a lot of text files, but they also have limitations. They are not perfect and you should always test the one you want to use
